**SENIOR INFORMATION RISK OWNER FOR HEALTH AND SOCIAL CARE: REFRESHER  
TRAINING JANUARY 26<sup>TH</sup> 2012****Who should attend?**

This day is for Senior Information Risk Owners [SIROs], and those who work with them, who have already completed the initial “Training for Senior Information Risk Owners” training day. SIROs have to regularly update their training [Information Governance Toolkit, Connecting for Health] in order to be compliant with the requirements of the Toolkit. This day provided the opportunity to review recent developments in the law and in practice, to focus on information assurance at a time of change in the NHS and social care services, and to receive an update on information security risk assessment. Information governance and assurance remains a high priority area for organisations, and this has been reinforced recently by a joint letter from the Information Commissioner and the NHS CE.
